**Note:**

Plastic tanks can be used to contain liquids (excluding flammable liquids / hydrocarbons) with a specific gravity of up to 1.7. Recommended maximum constant operating temperature is 140° F (moulded polyethylene itself is rated for 140° F). If a liquid is ruled to only be stored in a glass or steel container, then this tank should never be used to store that liquid. Any liquid approved to be stored in a plastic container would be suitable to be stored in these tanks.

Please request a drawing to confirm shape and dimensions are suitable.

# BARRELS & DRUMS

UN-approved plastic drums are manufactured using state-of-the-art technologies to meet the stringent demands of chemical compatibility with hazardous and non-hazardous products as well as reliability and safety requirements. Drums are made from a high molecular weight, high-density polyethylene resin. Closed head drums come standard with 2" BTR & 2" NPS fittings. Capacity is based on US Gal. readings. Accepted for use in Canadian food processing facilities.

# LEG TANKS

Plastic leg tanks can be used for storing water and most agricultural and industrial chemicals. When used for agriculture, lawn care, nurseries, water hauling or storage. Storage tanks are made of medium-density polyethylene HDPE, Heavy Duty, with ultraviolet (UV) inhibiting stabilizers for long-term outdoor storage. Not all tanks come with Manway & Female discharge, but they can be added. Leg tanks feature molded legs that act as baffles to reduce sloshing. Low profile design offers an increased safety factor and tank walls are translucent for visible content level.

# INDOOR WATER STORAGE TANKS

These indoor water storage tanks are specifically designed with commercial and residential uses in mind. The dimensions of these tanks allow them to easily fit through most doorways. Most are self supporting, while a few models come with a steel frame.

Reference	Capacity	Description	Dimensions	Style		
Part Number	Imp. GAL		LxWxH	Color	Fill Opening	Fittings
5110024	90	Loaf Tank	47" x 23" x 28"	Natural	6" Cap	None

44945	415	Tank	74" x 31" x 68"	Natural	16"	1-1/4"
44528	500	Ribbed Tank	58" x 35" x 82"	Natural	16"	None

" = Inches

# LOW PROFILE TANKS

The low-profile design of this tank makes it ideal for use on trailers or in the back of a truck. The slosh reduction ribs provide excellent structural support. It can also be used as a stationary water storage tank. Some are designed to fit through 30" doorways. Tanks are molded in one piece (no seams, no leaks) with flattened areas for positive seal of fittings. Designed to accommodate a large capacity in confined areas, a metal support frame for extra strength is available. Rounded ends are built in for a natural strength. Large top lids provide easy access to tank. Great for water hauling, pressure washing and drinking water.

Reference	Capacity		Description	Dimensions	Style

# OPEN TOP CYLINDRICAL TANKS

Easy to clean, heavy-duty cylindrical tanks. Ideal for mixing and storage of chemicals and food products. Molded from 100% virgin LLDPE (linear low-density polyethylene). Accepted for use in Canadian food processing facilities. Can remain full of liquids at room temperature without support. An economical alternative to stainless steel tanks. Naturally translucent so that the product level can be viewed at a glance. Includes a lid.

Reference	Capacity	Description	Dimension		Style	
Part number	Imp. GAL	Description	Height	Diameter	Color	Fittings

# FORKLIFTABLE CONTAINERS

Our forkliftable containers include a series of large bulk handling tubs for dry or fluid materials. These containers are available in various sizes, and we offer the option of flat bottom with four-way bolt on legs, or contoured bottom with two way entry. The bin boasts a hefty .375" thick average wall thickness and in the past have been used in food processing, recycling, toxic waste collection, transport, and rodent proof storage applications. Containers are nestable when empty for space saving transport or storage. Lids are available and allow containers to be stacked. These containers are CFIA approved.
