

# LOW PROFILE TANKS

The low-profile design of this tank makes it ideal for use on trailers or in the back of a truck. The slosh reduction ribs provide excellent structural support. It can also be used as a stationary water storage tank. Some are designed to fit through 30" doorways. Tanks are molded in one piece (no seams, no leaks) with flattened areas for positive seal of fittings. Designed to accommodate a large capacity in confined areas, a metal support frame for extra strength is available. Rounded ends are built in for a natural strength. Large top lids provide easy access to tank. Great for water hauling, pressure washing and drinking water.

Reference	Capacity		Description	Dimensions	Style	
Part Number	Litres	Imp. GAL		LxWxH	Color	Fill Opening
05120025	727	160	Low profile tank	80" X 46.5" X 15.5"	Natural	8" vented
